

SPORT FLOORINGS

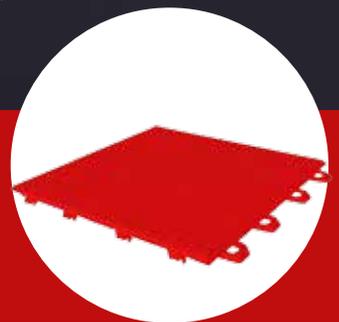

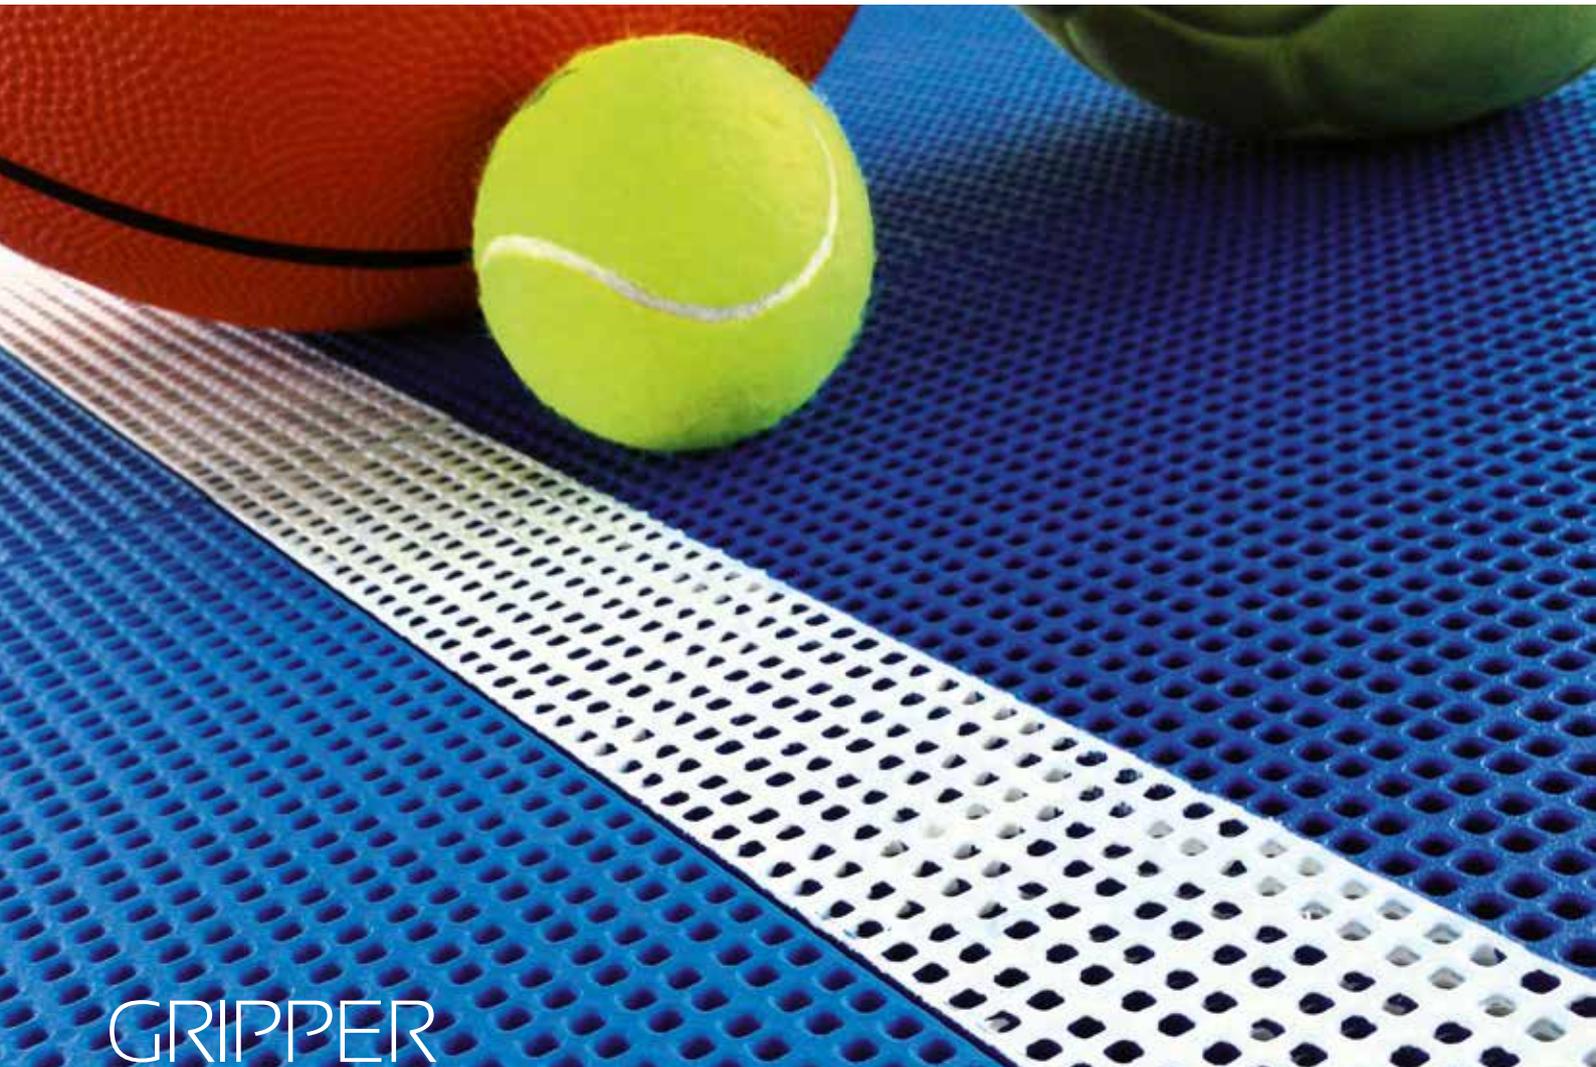

gripper

multipurpose surface

- POLIVALENT
- EASY TO INSTALL
- MOVABLE

GRIPPER VISION

Sport is health and fitness: this is the reason why it needs to be freely accessible to everyone. We pursue this value with great passion and this is our proposal: for all sports, for everyone, everywhere.

A MULTIPURPOSE ALTERNATIVE TO TRADITIONAL SURFACES

Nature gave us an extraordinary and efficient machine: the body. From that moment we could move freely and had the opportunity to change the world around us and become the predominant species on the Earth.

Thanks to our body we hunted, we dug shelters to protect ourselves from cold and weatherings, we travelled, we learnt to cultivate and build, step by step in the civilisation we live in.

Nowadays, our body's movement is no longer necessary for our survival. We created advanced technologies that provide to our needs. We, anyway have something left inside us, a primal instinct that needs to be followed in order to feel better: this instinct is called Sport.

Thanks to the extraordinary properties of Polypropylene (PP), which is a polymer resistant to stresses and weathering, Geoplast created a series of solutions

to guarantee high performances, reliability and versatility. **GRIPPER** is the surface any sport centre needs in order to satisfy enthusiasts of any type of sporting discipline.

EASY TO INSTALL

GRIPPER floorings are extremely quick and easy to install, thanks to the snap-fit coupling. **GRIPPER** is provided in pallets with pre-assembled tiles. The courts can be installed just hooking the pre-assembled tiles together applying a light pressure with the hands or feet.

**INSTALLATION IN
4 HOURS ONLY!**

MOVABLE

Portions of **GRIPPER** can be quickly moved to permit the transit of vehicles or any other mean and the development of other activities while the court is not used to play. All can be installed again just in a couple of minutes.

The easy installation and removal along with the fact that it can be transported in pallets, makes **GRIPPER** the ideal solution for temporary events both in squares and indoor

POLIVALENT

GRIPPER was studied to be a technical flooring for sports and give an high level response to the ball bounce, the grip and the safeguard of the athlete. Its resistance, draining capacity and practicality are ideal for any type of sport

activity. Your **GRIPPER** is extraordinary polivalent. Multipurpose beautiful and functional sport courts can easily being installed. Fun is granted.

CUSTOMIZABLE

The internal and external playing areas can be installed in two different colours and you can customize the court with writings to your liking

MATERIAL	PP resistant to UV rays
COUPLING	quick with snap-fit
SURFACE FINISHING	smooth without holes
PACKAGING SIZE	105 x 105 x H 180 cm 165 sqm.

INSTALLATION ON-SITE

#1

PREPARATION OF THE BACKGROUND

The ideal background to place **GRIPPER** is a smooth concrete surface. For the renovation of existing fields or for temporary events. The surface where the product is going to be placed, has to be cleaned and levelled as far as possible, in order to obtain a smooth and flat surface.

#2

GRIPPER INSTALLATION

Following the installation directions, the court can easily be installed just hooking the pre-assembled tiles together and applying a light pressure with the hands or feet. There's no need of adhesives or ground fixing, **GRIPPER** remains perfectly fixed to the ground thanks to its weight.

#3

LINES CREATION

The fields limitation lines, can be made with adhesive tape or road paint, depending on whether the field is temporary or permanent. For the final lines, you should however use paper tape, because it can be easily removed after the marking.

#4

INSTALLATION OF THE COURT'S EQUIPMENT

Once the installation and the lines marking are made, the equipments can finally be placed. You can install soccer goals, tennis nets and baskets but always leaving a little space between the flooring and the equipment. This is important in order to avoid the flooring's expansion during very warm days, precluding the surface's flatness.

BASKET

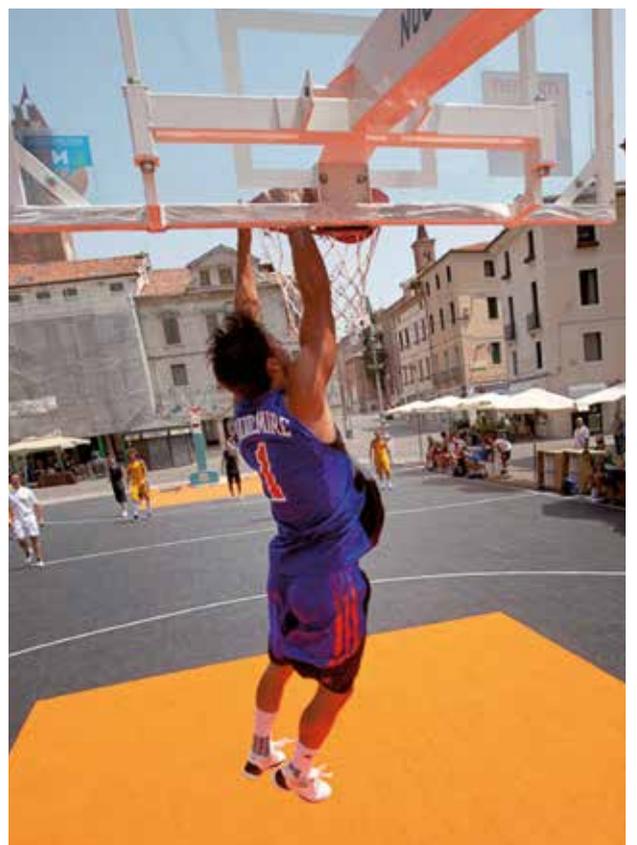

The right balance between stiffness and elasticity

Speed
Easy dribbling
Excellent grip

Basket requires an excellent game speed and the possibility to dribble easily. But it is also important to have the right grip in order to change directions easily and without hesitation. **GRIPPER** is designed to maintain this grip and also to keep the balance

between stiffness and elasticity. In this way, useless efforts during the dribbling can be avoided and any possible tumbling can be absorbed protecting the joints.

FUTSAL

High performance
and safety

Excellent grip
Great fluidity of the ball
Elasticity

Futsal is a fast and technical game that requires an excellent grip of the shoes to the ground, but also a great fluidity of the ball and high standards of comfort to safeguard the joints and and absorb any possible tumbling. **GRIPPER** perfect-

ly meets these needs. The innovative material used guarantees an ideal grip and the surface results to be mildly abrasive and very elastic.

TENNIS

The surface that meets every need

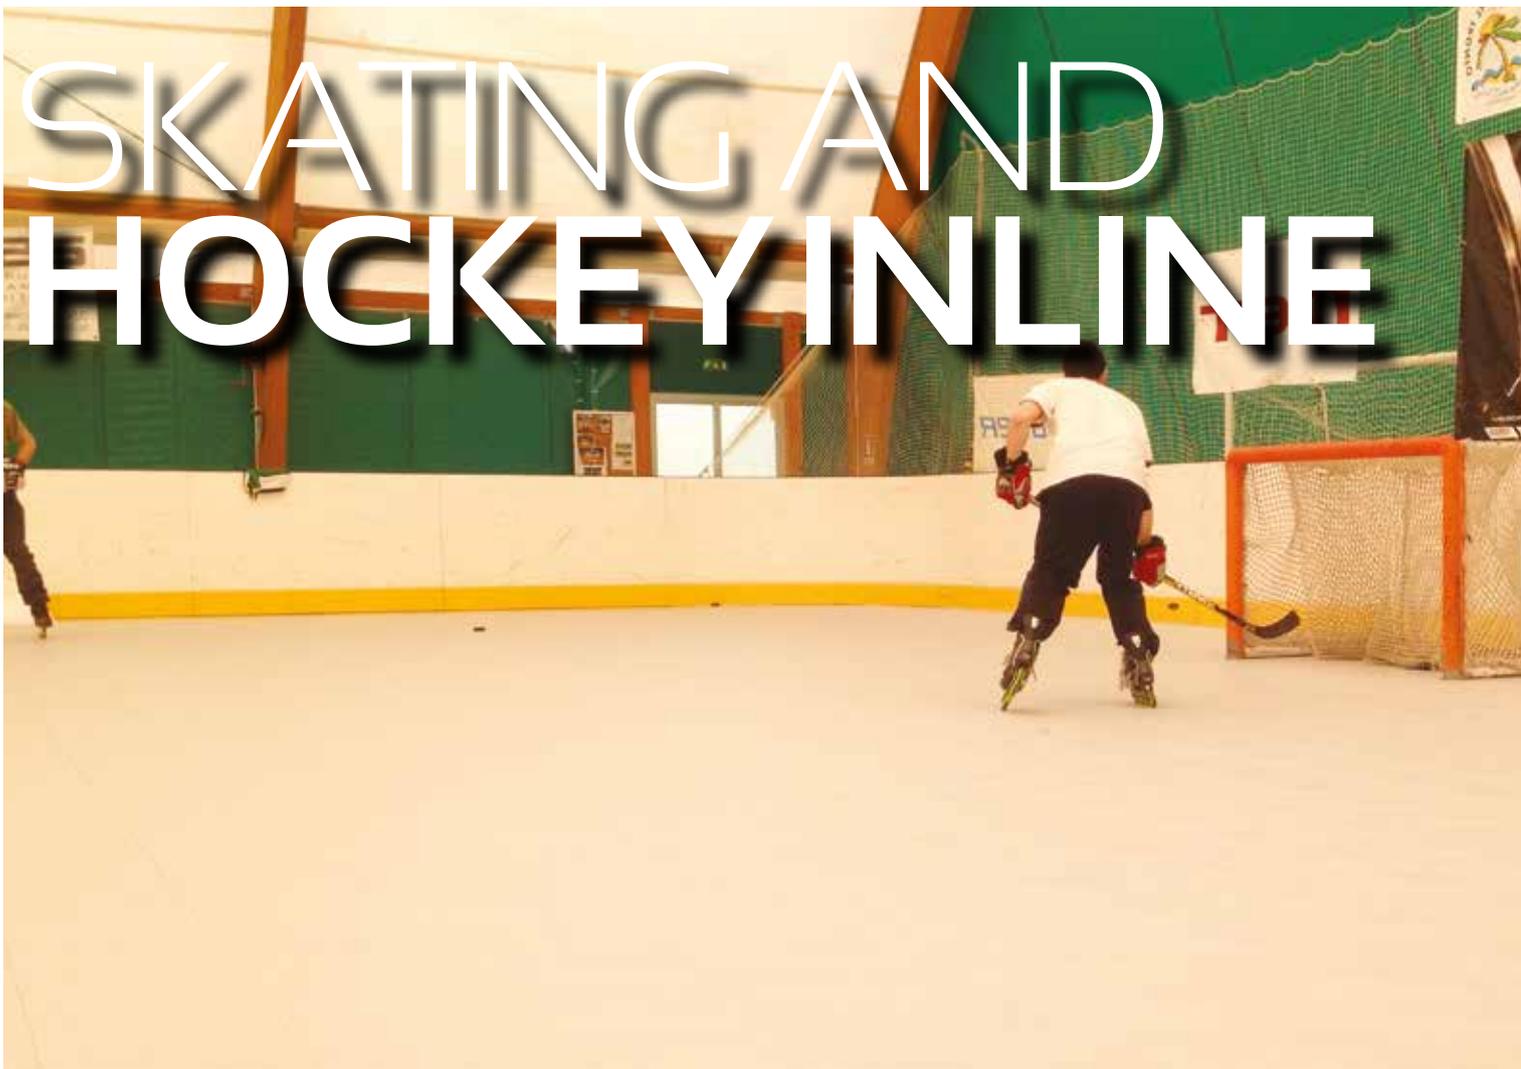

- Excellent grip
- Versatility
- No maintenance

Geoplast suggests two different solutions to play tennis

- **GRIPPER OUTDOOR 12"**, a multipurpose surface for those who love a fast game, such as the one played on concrete tennis courts.
- **GRIPPER TENNIS ROUGH**, specifically designed for

tennis. The game speed is similar to the one of clay courts, ideal to practice both competitive and amateur tennis.

SKATING AND HOCKEY IN LINE

Excellent friction and fluidity

Great slipping of the disk
Excellent grip
High performance

Hockey inline is a sport that uses specific equipments like inline skatings and a disk. **GRIPPER INDOOR** perfectly meets the needs of this sport. It guarantees a fluid skating and a great slipping of the disk. The plastic surface was in fact created to obtain the

exact characteristics of friction and fluidity this sport requires. At the same time it can be also used for futsal, basket and volleyball.
