

## CONTRIBUTES TO 14 LEED® POINTS

NEW ELEVETOR floor ventilation system solution helps you get up to 14 points for LEED certification. Potential points available:

MATERIALS AND RESOURCES		Contributes with 9 points
Credit 1.1	<b>Reuse of buildings: keeping 75% of the existing walls, ceilings and roof structures</b> (contributes to reduction in waste and new construction impact on the environment, even in respect of material processing and transport).	1
Credit 1.2	<b>Reuse of buildings: keeping 95% of the existing walls, ceilings and roof structures</b> (contributes to reduction in waste and new building impact on the environment, even in respect of material processing and transport).	1
Credit 1.3	<b>Reuse of buildings: keeping 50% of interior non-structural elements</b> (contributes to reduction in waste and new building impact on the environment, even in respect of material processing and transport).	1
Credit 2.1	<b>Construction waste management: reduction in waste transport to a landfill by 50%</b> (allows avoiding disposal of construction waste at a landfill and in incinerators, and contributes to reuse of secondary raw materials in the production process).	1
Credit 2.2	<b>Construction waste management: reduction in waste transport to a landfill by 75 %</b> (allows avoiding disposal of construction waste at a landfill and in incinerators, and contributes to reuse of secondary raw materials in the production process).	1
Credit 3.1	<b>Reuse of material: 5%</b> (contributes to reduction in raw materials and waste generation, thus restricting impacts of primary raw material processing on the environment).	1
Credit 3.2	<b>Reuse of material: 10%</b> (contributes to reduction in raw materials and waste generation, thus restricting impacts of primary raw material processing on the environment).	1
Credit 4.1	<b>Recycled content: 10%</b> (after consumption + 1/2 before consumption) (contributes to increase in demand for construction materials and products containing recycled materials, thus restricting the impact resulting from raw material separation and processing).	1
Credit 4.2	<b>Recycled content: 20%</b> (after consumption + 1/2 before consumption) (contributes to increase in demand for construction materials and products containing recycled materials, thus restricting the impact resulting from raw material separation and processing).	1
INTERIOR ENVIRONMENT QUALITY		Contributes with 1 point
Credit 7.1	<b>Providing thermal comfort</b> (contributes to creation of thermally comfortable environment which would provide wellbeing and productivity to building users).	1
INNOVATION & DESIGN PROCESS		Contributes with 4 points
Max 4 points for this project		
ID Credit	<b>Supplement to Materials and Raw Materials credit - Credit 2.2</b> (contributes to 100% reuse of secondary raw materials in production process).	1
ID Credit	<b>Supplement to Materials and Raw Materials credit - Credit 3.2</b> (contributes to 100% reduction in demand for raw materials and waste generation).	1
ID Credit	<b>Supplement to Materials and Raw Materials credit - Credit 4.2</b> (contributes to 100% increase in demand for products containing recycled materials).	1
ID Credit	<b>Supplement to Interior Environment Quality credit - Credit 7.1</b> (contributes to life comfort improvement).	1
